- ✓ Stability
- ✓ Flexibility
- ✓ Usability

### Sydmeko – the manufacturer of great ideas!

The Comfort Armrest System is a trademark owned and developed by Sydmeko Industri AB in Sweden. We have a sustainable production according to ISO:9001 and ISO:14001. Our products are registered in IMDS and are Reach approved. Comfort Armrest System is a complete integrated system for global use in passenger cars, light and heavy trucks, campers, busses and trains. It is also well suited for the disability industry. For more information about us and our products – please visit [www.sydmeko.com](http://www.sydmeko.com).

### Ultimate armrest solutions – for a better drive

Comfort is a dynamic armrest system that with its stability, flexibility and usability is ideal for the Automotive OE Aftermarket and OEM/OES.

Trusted by:

## **Stability** – mounted on the seat frame

The system consists of two parts, the armrest and the unique adapter bracket, that is secured directly on the seat frame. Both parts have reinforcements of steel and can handle loads up to 100 kg.

- TÜV / ABE-approved system
- Made in Sweden since 1989
- Easy to mount (15–30 minutes) – no drilling

## **Flexibility** – carry-over system

The system fits most vehicle models due to the individually developed adapter bracket. Once the adapter bracket has been developed you are free to choose from a wide range of armrest models. Customization of colours, materials and stitching options are available even for small series.

- Adapter bracket within 5 days – at low cost
- No investment costs in new tooling
- 3 years OE / OEM warranty

## **Usability** – with focus on ergonomics

The armrest system provides an optimal driving position, regardless of seat adjustments or the driver's height. Each armrest is adjustable, foldable and doesn't take up room in the centre console.

- Steplessly adjustable angle (up to 60°)
- Ensures a relaxed arm support at all times
- Integrated mobile phone charger, Qi (optional\*)

\*available for MLC310 armrest with storage compartment.

### **Quick & easy mounting – no drilling**

The adapter bracket is made of steel and is mounted in existing holes to ensure a stable fixing point. To access the seat frame you simply open/close the upholstery in a very fast and simple operation.

### **For every sense and purpose**

Design the armrest by adding colour, materials and stitching options – to create an exceptional and professional finish.

### **Integrated Qi mobile charger**

Equip the practical storage compartment with a plug-and-play Qi mobile charger – exclusively developed for the Automotive Industry.
